SUMMARY

Experienced Web Developer with 3 years of expertise in PHP and Node.js frameworks. Specializing in building robust server-side applications and APIs, proficient in MySQL database management. Adept collaborator in solving complex problems and delivering effective web development solutions. Enthusiastic about leveraging PHP development and JavaScript to create seamless and user-centric web interfaces.

WORK EXPERIENCE

Sr. Laravel Developer (*Code Brew Labs.*)

May 2023 - Present

- Led a team of 8 individuals, organizing daily meetings for efficient task management and collaboration; collaborated with project managers to align goals with monthly plans during daily Scrum meetings.
- Achieved an 85% improvement in system efficiency, reducing response time from 55 to 8 seconds; implemented performance monitoring on the dashboard for enhanced oversight.
- Established WebSocket connections with Node.js and PHP for real-time chat environment across diverse devices, improving user experience.
- Integrated the Agora platform to enable seamless video calls across devices, enhancing communication capabilities and user engagement.
- Demonstrated exceptional communication skills through client calls, conducting product demonstrations, and training sessions to ensure high client satisfaction and effective collaboration.

PHP Developer (*ToXSL Technologies Pvt. Ltd.*)

Feb 2021 - May 2023

- Achieved enhanced platform security by integrating Google reCAPTCHA v3.
- Improved data exchange efficiency with the Amadeus SOAP API.
- Streamlined payment processing with Stripe and automated invoice generation with Payfast and XERO.
- Implemented robust data storage solutions with WebRTC API and Cloudflare.
- Enhanced PDFs with JavaScript and Express.js to add annotations and input fields.
- Improved platform functionality and user satisfaction with Viator REST API integration.
- Optimized storage space and organized user data with Archive functionality for improved system performance.

PROJECTS

Mock Data Generator

[Link to Demo](#)

The JSON Preview Tool, powered by Node.js, Express.js, MongoDB, and Next.js, simplifies JSON data management and sharing in front-end projects. It facilitates efficient collaboration by enabling users to input data and generate public links. With an intuitive interface, it boosts productivity and streamlines development processes for frontend teams.

Royo

[Link to Demo](#)

At Royo, I built valuable new features using Laravel & MySQL and led cross-team collaboration to seamlessly integrate them. My focus on user-friendly design and rigorous testing boosted platform usability while Agile methods kept us on track and hit deadlines. It was a team effort, and I'm proud of the positive impact we made.

One-way Interview

A SaaS platform for a company based in South Africa. Build with Yii2, JavaScript, HTML, CSS, WebRTC and MySQL, The main objective of the project was to bring new changes to the interview process of companies, giving both interviewee and interviewer the right time to give or take an interview.
